## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4, 5, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by loka (6,558,006).

Regarding claim 1, loka discloses an image projection display apparatus showing at least first and second projectors (3a-3d), and an image processor (2) for adjusting the first and second image portions according to a quadratic relationship (col. 10, line 58, to col. 11, line 8).

Regarding claims 4 and 5, see col. 5, line 64, to col. 6, line 3.

Regarding claim 7, loka states that the gamma corrections for image A and image B are different from each other (col. 9, lines 39-42). This also means the gamma correction in the overlapping area is different from the non-overlapping areas because it is a result of two gamma corrections, A and B.

Regarding claim 8, see summary of the invention.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over loka (6,558,006) in view of Dorbie (6,545,685).

Regarding claim 6, loka does not disclose that the processor adjusts the brightness without relying on information provided by any screen image capture means. Instead, loka utilizes a camera 5. However, Dorbie, from the similar field of endeavor, teaches that the overlapping area of two projected images can be blended together without the need of feedback from a camera. By doing so, the blending apparatus can be made simple and low in cost. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to modify loka to include the cameraless blending feature of Dorbie so that the overall system could be kept simple and low in cost.

***Allowable Subject Matter***

5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 14-18 are allowed.

***Response to Arguments***

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sinh Tran, can be reached on 571-272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
